

**“TRUCKERS TO SHUT DOWN AMERICA”
RIDE FOR THE U.S. CONSTITUTION
OCTOBER 11TH THRU THE 13TH.**

Independent Truckers of America are essentially operating on slave wages; in most cases working below minimum wage, and all paying exorbitant fuel costs and fees. American truckers are also very politically astute and great patriots, and they are all well aware of what is happening to our U.S. Constitution. Through this campaign, they are leading the convoy of all Americans coast to coast who wish to restore our Constitutional Republic. America is calling out to our Patriots, and if any group can help lead the charge to save our nation, it's the U.S. Truckers.

The American people want our politicians to restore our Constitutional Republic NOW!

RideForTheConstitution.org

Independent Truckers across America have agreed to lead a “Ride for the Constitution” to Washington DC. This will be a very symbolic display of solidarity as potentially hundreds of thousands of truckers and millions of citizens can proceed to what we have always believed is our nation’s capital. Additionally, every single American can participate in this event coast-to-coast. Let’s face it, not everyone can afford to drive to Washington DC, and the Elite know this. They love the fact that the days of the “million man march” are gone because they have us so overworked and underpaid ---no time or money to protest or save their country. On October 11th, we are encouraging every single household to participate in many different ways; one of which is to get in their cars and join the truckers on your local highways to show your support! Just think; 30 million people on American roads; side-by-side with **Independent Truckers**. Obama, Kerry, McCain, Lindsay Graham, etc. should get the message. Best of all, we don’t need the media. We will run this place and take our country back --- they can **NEVER** stop us.

How can everyone get involved? If you are independent trucker and can afford to drive to Washington DC - DO IT! If you are afraid of your employer, or the U.S. Government, get out on the road anyways. Nobody will ever know why you were stuck in traffic. If you are an average American and have a personal vehicle, get in your car and get out on the road if you have the time or desire. The more people we have on the road, the louder our message will be. If you want to mind your own business and watch it all unfold on TV; you can refuse to buy anything the entire weekend - and if our legislators refuse our Constitutional demands, continue to not buy anything until they start following the law. The only way these criminals can survive is if we take our wallets out & spend money. Refuse to give them a dime until they comply with our lawful demands. Help spread the word NOW! This campaign will go viral if each of us gets the word out. The Elite control the media because they want to be the only ones talking to Americans. Let’s show them that we don’t need the media for us to get up off the couch and distribute flyers at our local truck stop in every city in America. We run this place & they will panic if they see us getting the word out without their system controls. “LIKE” the Facebook page, share the word with your friends, family members and neighbors, and stay tuned to guerillamedianetwork.com/convoy for constant updates about the event. Most importantly, create your own Facebook pages, Twitter accounts and blog so that these bastards can never shut this thing down. It needs to be a “de-centralized” effort - a gas-roots effort that will never give the D.H.S. or the government goons the chance to shut down a website or an organizer’s office. Take charge of your own neighborhoods, towns, major cities etc across America. Let each of us show these bastards who runs this place. Most importantly, let’s show them who owns and controls our minds and wallets. Share this document. Copy it, re-post it, encourage everyone else to do the same. We are Americans who run the United States of America - it’s not run by a bunch of millionaires. This is our house; our country; our government, and each of us needs to take ownership of how we succeed in this event. If we want to save our country, we will do so. If we don’t, it will be because you as an individual wanted someone else to save it for you - this is why we are in this mess - because we trusted someone better dressed, smarter, richer, better educated or more experienced. Look where that has gotten us. It’s time for each of us to say enough is enough & show them who runs this country. Let’s make them panic by getting off the couch. **We the people will save our country.**
